DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-4, 6 and 37 are rejected under 35 U.S.C. 102(b) as being unpatentable over Blake (US 5,944,729).

Regarding claims 1, 3-4, 6 and 37, Blake discloses a medical instrument 10 which can be used as a gripping instrument having: a body 34 with tissue grasping claws (26, 26) selectively movable between an open position and a closed position with the tissue grasping claws biased to a closed position; an actuating member with opposed members (22, 22) mated to the body and effective to move the claws between open and closed positions and a flexible member or string 48 for placement, withdrawal or maneuvering of instrument 10 that is selectively fastenable to a support (Figures 1-3, col. 2, lines 30-67, col. 3, lines 1-45).

The method steps of claim 37 are performed during normal operation of the Blake medical instrument for the purpose of gripping tissue or an organ.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Blake (US 5,944,729).

Regarding claim 5, although Blake does not disclose that tissue grasping elements (26,26) form a circular shape in the closed position, it would have been an obvious matter of design

Art Unit: 3732

choice to one skilled in the art at the time the invention was made to construct the tissue grasping elements with a circular shape, since Applicants have not disclosed that this solves any stated problem or is anything more than one of numerous shapes or configurations a person ordinary skill in the art would find obvious for the purpose of providing a tissue grasping element in the Blake instrument. *In re Dailey and Eilers, 149 USPQ 47 (1966)*.

Response to Arguments

Applicant's arguments with respect to claims 1, 3-6 and 37, under "REMARKS," in Paper No. 13, filed on November 11, 2003, have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 7-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anu Ramana whose telephone number is (703) 306-4035. The examiner can normally be reached Monday through Friday between 8:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on (703) 308-2582. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
